ABOUT ME

Software Engineer with 6+ years of professional experience, profound in all of the phases of Software Development Life Cycle (SDLC) for designing and building complex web applications and APIs. Perform business and technology analysis, system integration engineering, custom software development, support and maintenance, refactoring and re-engineering, unit testing and validation of services and solutions. Experienced in agile development and design of high volume and high quality software components and applications. Currently working with the Laravel Framework. Always thrilled to learn new stuff.

WORK EXPERIENCE

ZEROPLEX

March 2019 - Present

Senior Software Engineer / Project Lead Laravel Developer

Working as a Senior Software Engineer, Project Lead Developer as part of the remote Laravel Team from Xessable. Leading an internal all in one CRM/EMP/HRM/ICT Project.
